**casual beer
enjoyment**
20cl

THE BEST BEER GLASS

for brewers,
beer tasters and
beer lovers

A co-creation by Royal Leerdam Derek Walsh and André Köppen

Derek Walsh
beer consultant

For many years, I have been looking for the ideal glass to smell, judge, evaluate and drink beer.

Despite various tests, I have not been able to find a beer glass to optimally judge the aroma, color, clarity, foam and flavor.

André Köppen
beer sommelier

As a compromise, I've used the ISO INAO wine glass for more than 10 years as the other glasses currently available in the market just don't work.

This ISO wine glass is not really ideal for beer. I contacted Royal Leerdam to ask them if we could design the ideal beer glass together.

And that's exactly what we did....

Alfred De Groot
glass designer

Always looking for the perfect shapes...
